

Fleet electrification on your to-do list?

Start with a free consultation to figure out exactly what you need and then let Entergy help you get there.

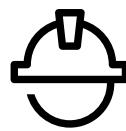

Entergy Fleet Solutions are 100% customizable to meet your needs whether you want a complete, turnkey offering or need an experienced partner to help connect your chargers to the grid.

READY. SET. CHARGE!

We will get you ready

 Are EVs right for your company? Will it work at your site? Should you start with a pilot or go all in? What environmental good will it do? Entergy will crunch the numbers and evaluate the options to help you decide if making the switch to an electric fleet makes dollars and sense for your business.

We will get you set

 Entergy will do all the legwork to set you up for fleet electrification. From assessing your site to Entergy owning the equipment and managing the on-site installation, we take care of everything so it's seamless and streamlined. And speaking of getting set, you can pay us over time for the charging infrastructure and installation.

We will help you charge

 Entergy will lay all the groundwork—the wires, conduit, and transformers to connect the charging stations to the electric grid. And you will receive a single monthly bill from Entergy that covers infrastructure, maintenance, and electricity. Once you're all set up, we stay by your side, providing the ongoing service and support you need to stay charging.
