Plug into the benefits of electric technologies

Entergy's eTech program promotes the adoption of clean electric-powered alternatives to many applications that traditionally require fossil fuels. In addition to the environmental benefits, you'll experience reduced maintenance and fuel costs and a safer and more efficient workplace.

Cash incentives

Cash incentives are available to Entergy customers who purchase select electric equipment. Examples include:

- Forklifts. \$250 - \$500
- Digital billboards. \$1500 - \$5000
- Electric truck refrigeration units. \$500 - \$1000
- Man lift (scissor or boom lift). \$100
- Riding or walk-behind floor scrubber. . . \$100 - \$150
- Golf cart/burden carrier \$150
- Level 2 EV charger (plug) \$250
- DC fast charger. \$750 - \$1500

Other electric technologies may also qualify and are determined on a case-by-case basis:

- Truck stop and fleet electrification
- Rail or mining equipment
- Material handling equipment
- Industrial equipment
- Marine and port equipment
- Industrial welding
- Airport ground support equipment

Do I qualify for incentives?

- Electric equipment and/or infrastructure must be installed at a facility that has electric service billed under an Entergy electric rate.
- Equipment must replace an internal combustion unit, be a first-time electric equipment purchase/lease, or be an expansion to an existing fleet.
- Used electric equipment is eligible for a reduced incentive based on the useful life of the equipment.

Sign up for a free consultation

We'll walk through your facility to identify potential custom rebate opportunities that help you and your employees enjoy the benefits of electrification upgrades.

Ready to get started?

Applying is easy. Visit entergyetech.com/apply-online to fill out the application form, and an eTech field representative will contact you to finalize the application.
